Open to remote and relocation across Canada · Legally eligible to work in Canada · Available immediately

SUMMARY

- Analytics professional with 4+ years across operations and finance. Built the star-schema data mart, Power BI semantic layer and source reconciliation as sole analyst at a perishable-goods distributor.
- Public analytics-engineering work adds dbt contracts, unit tests, incremental models, SCD2 and governed metrics, executed on DuckDB, Databricks and Snowflake. dbt and Airflow evidence is project-based, separate from paid Azure/Fabric delivery.

TECHNICAL SKILLS

Modelling: SQL/T-SQL, Kimball star schemas, conformed dimensions, SCD Type 1/2, medallion layers; dbt contracts, unit/data tests, snapshots, incrementals, exposures and downstream impact.

Metrics & quality: MetricFlow; Power BI DAX, semantic models, RLS/OLS, TMDL/PBIR; metric grain/owner definitions, reconciliation, freshness, quarantine/replay and pytest.

Paid platform scope: Microsoft Fabric, Azure Data Factory/Synapse, SQL Server, SSIS/SSRS, SQL, PySpark, Python/pandas and REST ingestion.

Project execution: DuckDB, Databricks SQL/Unity Catalog, Snowflake dbt/Streams/Tasks/Snowpark/RBAC; AWS Athena/S3/Glue; Airflow nightly scheduler in CI, GitHub Actions and Docker. Personal free/trial accounts, not enterprise operating tenure.

PROFESSIONAL EXPERIENCE

Two Rivers Specialty Meats

Dec 2023 – Jun 2026 · North Vancouver, BC

Data Analyst — Operations, Logistics & Enterprise Reporting

- Designed the enterprise data mart with star schemas, conformed dimensions and slowly changing dimensions for SKU, supplier, customer, region and channel analysis.
- As sole analyst, integrated ERP, Square POS, workforce and REST feeds into Bronze/Silver/Gold datasets using Microsoft Fabric, Azure Data Factory/Synapse, SQL and PySpark.
- Owned the Power BI semantic model, DAX library and drill-through reporting; defined revenue, margin, OTIF and inventory KPIs with Sales, Finance and Supply Chain, secured with RLS/RBAC and column masking.
- Built source-to-mart GL/P&L and inventory controls, cutting discrepancies an estimated ~45% and reporting errors ~30% (internal directional estimates, not audited).
- Automated schema, completeness, uniqueness and referential-integrity checks, with anomaly thresholds, exception logs and pipeline alerts.
- Maintained SSIS and SSRS while moving priority SQL Server pipelines to Fabric notebooks; validated cutover with row counts, checksums and control totals.

Shivam Investments

Dec 2020 – Jul 2022 · Vadodara, India (hybrid)

Financial Analyst — Data & Reporting

- Gathered requirements from portfolio and risk stakeholders; delivered Power BI dashboards with auditable measure definitions and reconciled GL/P&L figures across sources.
- Automated recurring preparation with Python and SQL views, replacing spreadsheet consolidation and cutting manual effort an estimated ~40% (internal directional estimate).

SELECTED PROJECTS — public code and CI-tested results; synthetic data is labelled

Supply Chain Analytics — dbt — dbt Core, Databricks, Snowflake, DuckDB, AWS Athena / S3 / Glue Data Catalog (project run), MetricFlow · synthetic data
github.com/KushPatel29/supply-chain-analytics-dbt · docs: kushpatel29.github.io/dbt-docs

Governed data product: Enforced executive-mart contract, unit tests, incremental facts, SCD2 snapshots and MetricFlow reconciliation. Executed on Databricks and Snowflake with 180/180 nodes green on each and all 41 totals equal to DuckDB. Airflow runs nightly under its scheduler in ephemeral CI. A bounded AWS Athena/S3 run independently reconciles 32 measures.

B.C. Local-Government Finance — dbt / DuckDB, SQL, Python, Excel · real public data
github.com/KushPatel29/bc-local-government-finance

Contracts on real public data: Validated 90 changing provincial files, built dbt models with 31 data tests and rebuilt Gold identically in CI. Found a $570M annual renewal shortfall across 68 municipalities and exposed a population file with 77 of 161 rows assigned to the wrong places.

Retail Analytics Platform — Python, DuckDB / SQL, dbt on Snowflake, Flask · synthetic data
github.com/KushPatel29/wholesale-analytics-platform · live: kushpatel29.github.io/wholesale-analytics-platform

Metric governance: Traced a margin mismatch to $333,573 of cost on 3,056 unshipped lines. Governed 62 definitions, including explicitly unavailable metrics. Snowflake execution exposed three source defects; 48/48 nodes passed and 107 measures reconciled to an independent pandas build. Synthetic data.

GrowthOps OS — dbt, SQL, Power BI (DAX), Excel, Python · synthetic data
github.com/KushPatel29/GrowthOps-OS · live: growthops-os.streamlit.app

Independent consumers: Synthetic ad, CRM and payment marts bridge $3.72M claimed revenue to $3.06M cash. Power BI and a formula-driven Excel workbook independently tie to the same totals, demonstrating metric consistency across tools.

Further pipeline and migration evidence: kushpatel29.github.io. All cloud execution receipts identify account scope and dated runs.

EDUCATION

Northeastern University — Master of Professional Studies in Analytics (Applied Machine Intelligence), GPA 3.76/4.0 · Vancouver, BC — **Sep 2022 – Jun 2024**

Gujarat Technological University — Bachelor of Engineering, Computer Science · India — **Aug 2017 – Aug 2021**

CERTIFICATIONS

Databricks Lakehouse Fundamentals · Power BI Data Modelling with DAX · UC Davis SQL for Data Science · Google Data Analytics Professional Certificate · IBM Python for Data Science, AI & Development. Preparing for the Microsoft DP-600 (Fabric Analytics Engineer) exam. First prize, 2024 wildfire-prediction hackathon.
