# KUSH PATEL

**Business Analyst | Requirements · Process Mapping · UAT · Business Cases · Data | SQL · Power BI · Excel**

Vancouver, BC | +1 (778) 637-1602 | dharma.patel552@gmail.com | linkedin.com/in/kush-patel-48885719b | github.com/KushPatel29 | kushpatel29.github.io

Open to remote and relocation across Canada · Legally eligible to work in Canada · Available immediately

## SUMMARY

- Analytics professional with 4+ years translating Sales, Finance and Supply Chain questions into KPI definitions, acceptance criteria and reporting. Paid background spans a perishable-goods distributor and financial reporting.
- Public BA cases connect current/future processes, requirements, options and UAT to executable evidence. A personal Jira/Confluence delivery pack links 5 epics and 16 stories; manual acceptance remains open rather than being presented as completed sign-off.

## SKILLS

**Requirements:** Stakeholder elicitation, business/functional/non-functional requirements, MoSCoW, user stories, Given/When/Then criteria and traceability.

**Process & change:** Current/future-state maps, root-cause analysis, RACI, RAID, status reporting, adoption plans, cutover and rollback planning.

**Acceptance & decisions:** UAT scenarios, defect handling, entry/exit criteria, test-linked acceptance, business cases, options, sensitivity and KPI governance.

**Tools:** SQL/T-SQL, Power BI/DAX, Excel/Power Query/Power Pivot, Python/pandas, Microsoft Fabric; Jira Cloud and Confluence in personal project work.

## PROFESSIONAL EXPERIENCE

### Two Rivers Specialty Meats

**Dec 2023 – Jun 2026 · North Vancouver, BC**

**Data Analyst — Operations, Logistics & Enterprise Reporting**

- Defined revenue, margin, OTIF and inventory KPIs with Sales, Finance and Supply Chain, documenting definitions and acceptance criteria for variance and margin reviews.
- Built source-to-mart GL/P&L and inventory controls, cutting discrepancies an estimated ~45% and reporting errors ~30% (internal directional estimates, not audited).
- Delivered self-service Power BI with RLS and column masking, plus inactivity, rep-coverage, FEFO and lot-traceability reporting.
- Maintained SSIS and SSRS while moving priority SQL Server pipelines to Fabric notebooks; validated cutover with row counts, checksums and control totals.
- As sole analyst, integrated ERP, Square POS, workforce and REST feeds into Bronze/Silver/Gold datasets using Microsoft Fabric, Azure Data Factory/Synapse, SQL and PySpark.

### Shivam Investments

**Dec 2020 – Jul 2022 · Vadodara, India (hybrid)**

**Financial Analyst — Data & Reporting**

- Gathered requirements from portfolio and risk stakeholders; delivered Power BI dashboards with auditable measure definitions and reconciled GL/P&L figures across sources.
- Automated recurring preparation with Python and SQL views, replacing spreadsheet consolidation and cutting manual effort an estimated ~40% (internal directional estimate).

## SELECTED PROJECTS — public documents and code; organisations and data are synthetic unless labelled

**Legacy-to-Fabric Migration: BA delivery pack** — requirements, backlog, RACI, RAID, change plan, business case
**github.com/KushPatel29/legacy-to-fabric-migration · live: kush-asset-management-decision-board.streamlit.app**

**Requirements through acceptance:** A synthetic 140-artifact programme with charter, stakeholder map, RACI, process maps, requirements, RAID and adoption plan. Five epics and 16 stories link criteria to automated tests or manual UAT. Jira and Confluence records link reciprocally; stories reach Done only when every criterion executes in CI.

**Inventory Analytics · Operations Decision Studio** — Python, DuckDB / SQL, Flask, Docker · synthetic data
**github.com/KushPatel29/inventory-analytics-app · live: kushpatel29.github.io/inventory-analytics-app**

**Working requirements and UAT:** Traced 13 requirements to 12 UAT scenarios for an inventory decision studio. Current/future replenishment and exception processes define owners, handoffs and controls; the tool checks spare stock and service cost before recommending a purchase. Synthetic inventory data.

**B.C. Local-Government Finance** — Excel, dbt / DuckDB, Python · real public data
**github.com/KushPatel29/bc-local-government-finance**

**Options and financial consequences:** Real public-data plan for 161 municipalities compares renewal pace, borrowing and tax. For Fernie, closing the modelled gap by 2029 needs 3.7% annual tax growth under the stated assumptions. Workbook and board pack expose the calculation and limits.

Additional clinical UAT and healthcare decision packets at kushpatel29.github.io use synthetic data. They demonstrate delivery methods, not health-system employment or completed client approvals.

## EDUCATION

**Northeastern University** — Master of Professional Studies in Analytics (Applied Machine Intelligence), GPA 3.76/4.0 · Vancouver, BC — **Sep 2022 – Jun 2024**

**Gujarat Technological University** — Bachelor of Engineering, Computer Science · India — **Aug 2017 – Aug 2021**

## CERTIFICATIONS

Google Data Analytics Professional Certificate · UC Davis SQL for Data Science · Power BI Data Modelling with DAX · IBM Python for Data Science, AI & Development · Databricks Lakehouse Fundamentals.
