KUSH PATEL

Data Analyst | BI & Analytics Engineer | Power BI · SQL · Python · Microsoft Fabric · Databricks · dbt

Vancouver, BC | +1 (778) 637-1602 | dharma.patel552@gmail.com | linkedin.com/in/kush-patel-48885719b | github.com/KushPatel29 | kushpatel29.github.io

Open to remote and relocation across Canada · Legally eligible to work in Canada · Available immediately

SUMMARY

- Data analyst and BI / analytics engineer with 4+ years across operations and financial reporting. Sole analyst at a perishable-goods distributor; previously a financial analyst performing month-end GL/P&L reconciliation.
- Builds governed SQL models, Azure/Fabric pipelines and Power BI reporting for Sales, Finance and Supply Chain. Public cases show independent reconciliation, tested failure handling and decisions on real public or clearly labelled synthetic data.

TECHNICAL SKILLS

Analysis & BI: SQL (T-SQL, CTEs, window functions), Power BI (DAX, Power Query, semantic models, RLS/OLS), Excel (Power Pivot, dynamic arrays, LAMBDA, what-if tables), Python/pandas, Tableau, SSRS.

Data platforms: Microsoft Fabric, Azure Data Factory/Synapse, SQL Server, PySpark, Delta Lake; star schemas, conformed dimensions, SCD Type 1/2, incremental loads and API ingestion.

Controls & delivery: KPI definitions, reconciliation, data-quality gates, cutover validation, access controls, requirements and UAT; Git, pytest and GitHub Actions in public projects.

Project execution: dbt on DuckDB, Databricks and Snowflake; Airflow scheduler in nightly CI; Snowflake Streams/Tasks, Snowpark and RBAC; bounded AWS Athena/S3/Glue run. Free/trial accounts and CI are separate from employer production.

PROFESSIONAL EXPERIENCE

Two Rivers Specialty Meats

Dec 2023 – Jun 2026 · North Vancouver, BC

Data Analyst — Operations, Logistics & Enterprise Reporting

- As sole analyst, integrated ERP, Square POS, workforce and REST feeds into Bronze/Silver/Gold datasets using Microsoft Fabric, Azure Data Factory/Synapse, SQL and PySpark.
- Designed the enterprise data mart with star schemas, conformed dimensions and slowly changing dimensions for SKU, supplier, customer, region and channel reporting.
- Owned the Power BI semantic model, DAX library and drill-through reporting; defined revenue, margin, OTIF and inventory KPIs with Sales, Finance and Supply Chain, secured with RLS/RBAC and column masking.
- Built source-to-mart GL/P&L and inventory controls, cutting discrepancies an estimated ~45% and reporting errors ~30% (internal directional estimates, not audited).
- Automated schema, completeness, uniqueness and referential-integrity checks, with anomaly thresholds, exception logs and pipeline alerts.
- Maintained SSIS and SSRS while moving priority SQL Server pipelines to Fabric notebooks; validated cutover with row counts, checksums and control totals.
- Delivered FEFO and lot-level traceability, customer inactivity and rep-coverage reporting, and SKU demand forecasts as Python web apps supporting procurement and lower perishable waste.

Shivam Investments

Dec 2020 – Jul 2022 · Vadodara, India (hybrid)

Financial Analyst — Data & Reporting

- Gathered requirements from portfolio and risk stakeholders; delivered Power BI dashboards with auditable measure definitions and reconciled GL/P&L figures across sources.
- Automated recurring preparation with Python and SQL views, replacing spreadsheet consolidation and cutting manual effort an estimated ~40% (internal directional estimate).

SELECTED PROJECTS — public code, documents you can download and CI-tested results

GrowthOps OS — Power BI (DAX), Excel, SQL, dbt, Python

github.com/KushPatel29/GrowthOps-OS · live: growthops-os.streamlit.app

Revenue reconciliation: On synthetic business data, explained the bridge from $3.72M claimed revenue to $3.06M collected cash. A seven-page Power BI report and formula-driven Excel workbook agree independently to the cent. Meta ROAS falls from 7.3× claimed to 3.3× on cash; a lead-quality decline traces to one campaign.

Supply Chain Control Tower — PySpark, Delta Lake, Databricks, Power BI, SQL

github.com/KushPatel29/supply-chain-control-tower · live: kush-network-risk-decision-room.streamlit.app

Pipeline and operations decisions: Synthetic distribution data passes schema contracts, quarantine/replay and a Gold quality gate, each tested with injected failures. Benchmarked at 10M rows; all 36 Gold measures reconciled on Databricks. An eight-page Power BI report separates short-shipping from lateness and identifies replenishment gaps addressable without buying stock.

B.C. Local-Government Finance — SQL, dbt / DuckDB, Python, Excel, Power Query · real public data

github.com/KushPatel29/bc-local-government-finance

Real public-data analysis: Contract-checked 90 provincial files and built dbt models with 31 data tests plus an Excel plan for 161 municipalities. Estimated a $570M annual renewal shortfall across 68 municipalities and caught a population file assigning 77 of 161 rows to the wrong places.

21 public projects and 16 hosted demos, including FP&A, retail metric governance and prospectively graded wildfire forecasts, at kushpatel29.github.io. Three captioned flagship tours explain the question, result and checks.

EDUCATION

Northeastern University — Master of Professional Studies in Analytics (Applied Machine Intelligence), GPA 3.76/4.0 · Vancouver, BC — **Sep 2022 – Jun 2024**

Gujarat Technological University — Bachelor of Engineering, Computer Science · India — **Aug 2017 – Aug 2021**

AWARDS & CERTIFICATIONS

First prize, 2024 wildfire-prediction hackathon (now a live forecast) · Google Data Analytics Professional Certificate · UC Davis SQL for Data Science · IBM Python for Data Science, AI & Development · Databricks Lakehouse Fundamentals · Power BI Data Modelling with DAX. Preparing for the Microsoft DP-600 (Fabric Analytics Engineer) exam.
