

KUSH PATEL

Business Intelligence & Analytics Specialist | Microsoft Fabric | Power BI | SSIS/SSRS | SQL | PySpark

Vancouver, BC (Hybrid - Richmond) | +1 (778) 637-1602 | dharmapatel552@gmail.com | [LinkedIn](#)

SUMMARY

- BI & Analytics Specialist with 4+ years delivering finance-grade (GL/P&L) and operations-ready reporting across Sales, Finance, and Supply Chain in food/perishable environments (inventory, logistics, FEFO/expiry, lot traceability, yield and waste reduction).
- Hands-on with Microsoft Fabric (Lakehouse/Warehouse concepts, notebooks), Power BI (DAX, semantic modeling, performance tuning) and Azure Data Factory/Synapse; modernized legacy SQL Server BI while maintaining continuity for critical reporting.
- Strong in governance and security: metric definition/ownership, Kimball/star schema modeling, reconciliation controls and discrepancy triage, plus secure-by-design delivery (RLS/RBAC, column-level security, masking/anonymization).

CORE COMPETENCIES

Requirements workshops & KPI definition; stakeholder partnering (Sales/Finance/Supply Chain); Microsoft Fabric pipelines/notebooks (SQL, PySpark); SSIS ETL and SSRS paginated reporting; data validation & discrepancy investigation; enterprise modeling (facts/dimensions, SCD basics); RLS/RBAC, data masking; automation & process improvement; ERP/POS/API integration

TECHNICAL SKILLS

BI & Reporting: Power BI (DAX, Power Query, semantic modeling), SSRS (paginated reports), Excel (Power Pivot/Power Query)

Data Engineering: SQL (T-SQL), PySpark/Spark, Python (pandas, SQLAlchemy), REST APIs/JSON

Platforms: Microsoft Fabric (Lakehouse/Warehouse, OneLake/DirectLake concepts), Azure Data Factory (ADF), Azure Synapse, Snowflake

Legacy Microsoft BI: SSIS (Integration Services), SQL Server Agent scheduling, stored procedures, indexing/performance tuning

Modeling & Governance: Star schema (Kimball), semantic layer design, metric dictionary, data quality SLAs, lineage/runbooks

Security & Quality: RLS, RBAC, column-level security, masking/anonymization, reconciliations, monitoring/alerts

Tools: Git/GitHub, Jenkins (CI/CD basics)

PROFESSIONAL EXPERIENCE

Two Rivers Specialty Meats — Vancouver, BC

Data Analyst - Operations, Logistics & Enterprise Reporting

Dec 2023 - Present

- Led requirements sessions with Sales, Finance, and Supply Chain; defined governed KPIs for P&L/GL reporting (revenue, COGS, gross margin) and operations (OTIF, inventory turns, days on hand); documented metric definitions and acceptance criteria.
- Built Power BI semantic models (star schema) with standardized DAX measures and drilldowns by product/SKU, supplier, region, customer and channel; optimized performance for executive and operational usage.
- Developed ELT/ETL pipelines in Microsoft Fabric and Azure Data Factory/Synapse using SQL and PySpark; implemented incremental loads, transformation logic, and curated datasets aligned to Bronze/Silver/Gold patterns.
- Owned legacy SQL Server BI delivery: built/maintained SSIS packages (parameterization, error handling, SQL Agent schedules) and SSRS paginated reports/subscriptions used for finance packs and operational reporting.
- Implemented automated data quality and reconciliation controls (schema/completeness/uniqueness/referential integrity/control totals) with logging and exception reporting; reduced recurring discrepancies by ~45% and reporting errors by ~30%.

- Engineered perishable inventory analytics including FEFO/expiry risk, lot traceability and inventory aging to reduce waste and improve stock availability; investigated discrepancies across ERP/POS/API sources and drove corrective fixes.
- Implemented secure-by-design reporting (RLS/RBAC, column-level filtering, masking/anonymization) to protect sensitive cost/margin and people data while enabling self-serve insights.

Shivam Investments — India / Remote

Financial Analyst (Data & Reporting)

Dec 2020 - Jul 2022

- Gathered reporting requirements from portfolio and risk stakeholders; delivered Power BI dashboards with drilldowns and auditability.
- Automated recurring analysis using Python (pandas) and SQL views feeding Power BI; reduced manual effort by ~40% and improved reporting timeliness.
- Performed GL/P&L reconciliations across sources and investigated discrepancies to improve finance-grade accuracy.

ANALYTICS PROJECTS

Supply Chain Control Tower (Microsoft Fabric Lakehouse, ADF, PySpark/SQL, Power BI)

- Engineered a Supply Chain Control Tower backed by a Fabric Lakehouse (Bronze/Silver/Gold) with incremental loads, unit-of-measure conversions, and FEFO/shelf-life calculations.
- Modeled curated star schemas and a governed semantic model; implemented RLS/RBAC so Sales, Finance, and Operations see only authorized margin and inventory data.
- Delivered KPI suite (inventory turns, days on hand, OTIF/fill rate, stock-out and expiry risk) with exception flags, drilldowns to SKU/lot, and refresh monitoring.

Legacy BI Modernization (SQL Server, SSIS/SSRS, T-SQL -> Microsoft Fabric)

- Maintained and enhanced the SQL Server BI estate: SSIS packages (control flow/data flow, SCD patterns, SQL Agent schedules) and SSRS paginated reports/subscriptions for finance-grade statements.
- Refactored priority pipelines to Fabric Data Pipelines/Dataflows Gen2 and PySpark notebooks; replaced stored-procedure heavy transforms with scalable notebook patterns where appropriate.
- Executed parallel-run validation (row counts, checksums, control totals) and documented cutover/runbooks to retire technical debt without disrupting stakeholders.

Data Quality & Observability (Fabric/ADF, SQL, Power BI)

- Operationalized data quality monitoring across lakehouse layers: schema drift, null/duplicate checks, referential integrity, and anomaly thresholds on key measures.
- Built reconciliation dashboards comparing source vs curated totals (GL/P&L and inventory valuation) and led root-cause investigations to resolve discrepancies.
- Implemented alerting and incident runbooks to reduce repeat failures and improve reliability of executive reporting.

EDUCATION

Northeastern University, Vancouver, BC — Master of Professional Studies in Analytics (Applied Machine Intelligence), GPA 3.76/4.0 | Sep 2022 - Apr 2024

Gujarat Technological University, India — Bachelor of Engineering in Computer Science | Aug 2017 - Aug 2021

CERTIFICATIONS

- Google Data Analytics; Power BI Data Modelling with DAX; Advanced SQL
- IBM Python for Data Science, AI and Development
- SQL for Data Science: Data Pipelines, Database Management, Data Modeling
- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) – In Progress

ERP & FABRIC READINESS

- ERP data extraction and modeling via governed views/semantic layers; able to ramp quickly on IFS Cloud access views and Microsoft Fabric lakehouse patterns.
